

## HTML

### THE LIST OF TAGS THAT I LEARNED TODAY:

**<html> </html>:** It is the root of the HTML document which is used to specify that the document is HTML.

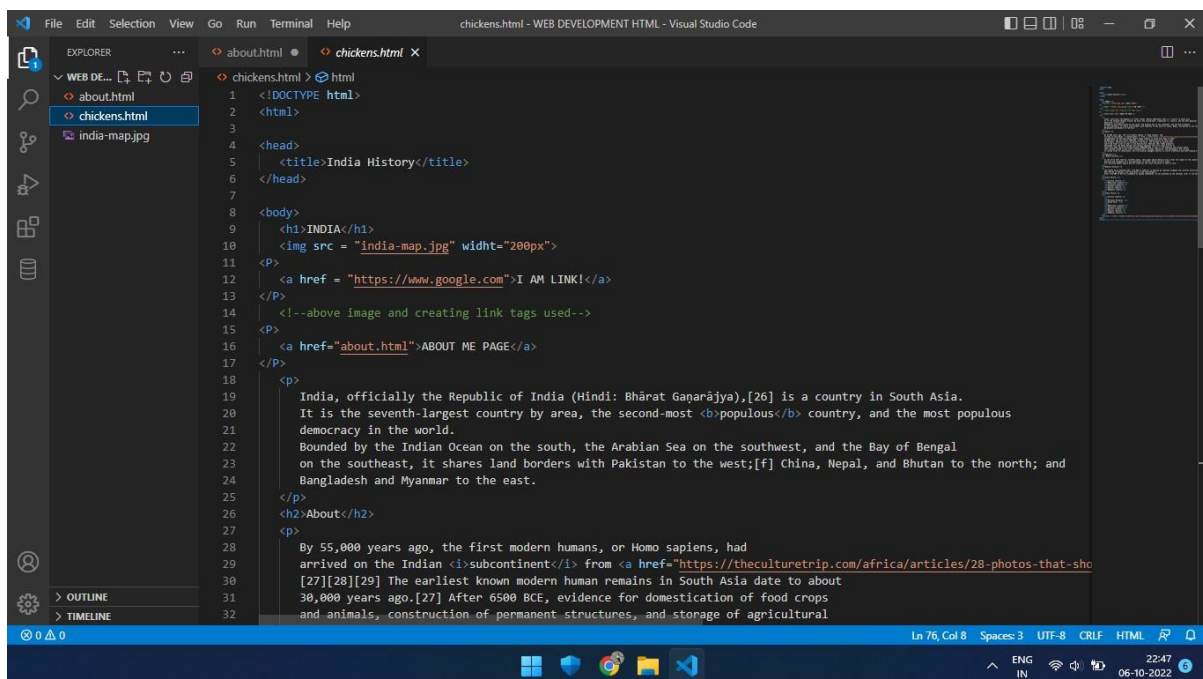

**<head></head>:** The head tag is used to contain all the head elements in the HTML file. It contains the title, style, meta, ... etc tag.

**<body></body>:** It is used to define the body of an HTML document. It contains images, tables, lists, ... etc.

**<p></P>:** It is used to define paragraph content in an HTML document.

**<h1></h1>:** It is used to define the heading of an HTML document.

### TASK I PERFORMED TODAY:

A screenshot of the Visual Studio Code editor interface. The Explorer panel on the left shows a file named 'chickens.html' selected. The main editor area displays the HTML code for 'chickens.html'. The code includes a DOCTYPE declaration, a title 'India History', and a body containing an h1 tag 'INDIA', an image tag 'india-map.jpg', and several paragraphs of text about India. The status bar at the bottom indicates the file is at line 76, column 8, with 3 spaces, UTF-8 encoding, and CRLF line endings. The system tray at the bottom right shows the date and time as 22:47 on 06-10-2022.

18 <p>
19   India, officially the Republic of India (Hindi: Bhārat Gaṇarājya),[26] is a country in South Asia.
20   It is the seventh-largest country by area, the second-most <b>populous</b> country, and the most populous
21   democracy in the world.
22   Bounded by the Indian Ocean on the south, the Arabian Sea on the southwest, and the Bay of Bengal
23   on the southeast, it shares land borders with Pakistan to the west;[f] China, Nepal, and Bhutan to the north; and
24   Bangladesh and Myanmar to the east.
